

Engraving solution  
for small items

*Driven/Controlled by the GravoStyle™ software.*

m20

# m20

## SIMPLE TO USE, VERSATILE AND COMPACT

Gravograph rotary machines are available with a host of unique and innovative features.

It efficiently answers the need for object personalisation and small signs realisation.

The M20 is perfect for engraving on numerous flat objects and materials. All-in-one, this solution allows you to add value to your product range.

The M20 solution includes the engraving machine, the software, the necessary tools and the user's maintenance manual.

↕ 345 x 315 x 310 mm

👤 10 kg

Controlled by the GravoStyle™ software

### Focus on Point & Shoot

An integrated red laser beam pointer assists you to easily and precisely position the engraving onto the object, to help save time and eliminate risk of error.

### Operating Software

GravoStyle™ Explorer, the unique engraving software delivered with the machine allows you to create your jobs with great freedom. User-friendly and open, GravoStyle™ communicates both with the machine and other graphic solutions and allows you to get started quickly.

The numerous job dedicated features and options, for example Photostyle for picture engraving, and the multiple possibilities offered provide an incredible easy-to-use solution. Its ergonomic interface includes fonts, symbols, ornaments and text tools to enrich your creations. Practical, GravoStyle™ saves the parameters adapted to each material.

## Technical characteristics

## True advantages to boost your productivity

Compact, the M20 is no bigger than a desk printer. It easily finds a place in your work environment, whether it is a workbench, office or counter.

Flexible, the M20 is well suited for a great number of items from small signs to picture engraving for multi purpose activities.

Its operating mode is simple and ergonomic. Users reap the benefits of immediate engraving while still being able to focus on their business and customers.

Aesthetic and silent, users can place their M20 on their point of sale, creating an animation and generating revenue.

“

*Over two hundred of our branches are now equipped with an M20 engraver.*

*We decided on this system as we were looking for a machine that was compact, easy to use and reliable – with back up from an established supplier.*

*Many more of our branches will be using an M20 in the coming years as we continue to develop our engraving business.*

”

Perry Watkins, Retail Director  
Timpson, United Kingdom.

**Ideal for:**

- Bracelet, medal and watch personalisation.
- Picture engraving on metallic objects and jewels.
- Cutlery, gifts (pens, keychains, lighters).
- Realization of engraved plates: identification, animal medals, small signs.
- Engraving on plastic, acrylic, aluminium, precious metals. Diamond marking on metallic objects.
